

ATRAX

Bullet-proof interactive touchscreen kiosk

Unattended outdoor weighing, configured to suit

Fully weatherproof truck scale kiosk designed and built for outdoor weighbridges in harsh conditions. Get the best build quality and lowest ongoing costs.

- Driver stays in vehicle
- No shelter needed
- Modular for easy servicing & parts swap out
- Run your software or ours
- Can use as stand-alone kiosk with scale indicator
- Printer & no-printer options

Designed & built for tough Australian and NZ conditions

Fully weather-proof and dust-proof. Dual-walled for additional protection. Epoxy painted mild steel internal box. Aluminium external casing. Compression lock mechanism creates tight seals. High contrast touchscreen display for harsh sunlight. Built to last.

Run any software

Keep your existing software or use ours. We can pre-load with industry-leading Weightrax software. Weightrax is cloud-based and allows remote access via a secure website to view transactions, call up reports, or modify and add information. No more on-site visits. Automatic online upgrades and 24/7 support.

Hassle-free printing

Simple to use. Bright flashing green light tells driver when ticket is printed. High speed, high quality print. Easy-access printer takes synthetic or standard paper. Big 150mm roll of paper means fewer paper changes. Easy to change paper roll or clear any jams. Reputation for reliability.

Flexible, customised

Your choice of fronts. Touch screen or scale indicator. Computer optional. Printer optional. Other options and peripherals to suit you – ask us.

Control other devices

Control of weighbridge barriers, traffic lights, access gates, stop/go and all other digital inputs/outputs.

Modular design

Quick servicing and fast exchange of parts. Easy access for servicing or paper change. Lower costs and more uptime.

Dallas tags or ID cards

Lots of card or tag reader options including access or swipe cards.

Full computer option

Choose a full PC with touchscreen monitor and multiple serial and network ports. Wi-Fi and Bluetooth enabled. Easy to run a security camera or other peripherals through kiosk.

Stand-alone kiosk with scale indicator

Choose a no-computer option with just a display screen and printer. Perfect for connecting to a remote computer.

No cell phone reception? No worries

As long as there's power, we can take care of the rest – even if mobile coverage is dodgy or non-existent. Talk to us.

Manned or unmanned sites

Self-service options perfect for sites where a manned office is not possible or economical. Drivers can do it all themselves.

Loader integration options

Integrate (via tablet) with loader drivers or other staff onsite. Staff working anywhere onsite can see what driver has declared.

Mounted your way

Pedestal, pole mount, wall mounting or panel mounting. Built in lifting lugs aid installation. No shelter required. Dimensions are 498mm W x 260mm D x 762mm H.

WEIGHTRAX

Designed, built and supported by Weightrax, part of the Atrax Group. Atrax is the world leader in the design, manufacture, integration and support of industrial weighing, measurement and related control systems for the airport and logistics industries. Over 800 airport sites across 140 countries use Atrax products and systems.

Contact us to discuss your needs. Ask us for a quick video overview. Depending on your location we can arrange an onsite visit to show you an installed kiosk.
